Liste des publications de l’EREN (2012-2019)

2012

   Bidirectional association between depression and obesity in middle-aged and older women.

2. Czernichow S, Knol MJ, Fezeu L, Grobbee DE
   Impact of orlistat initiation on cardiovascular treatment use: a 6-year population-based cohort study.

   Total and specific polyphenol intakes in midlife are associated with cognitive function measured 13 years later.

   Cross-sectional but not longitudinal association between n-3 fatty acid intake and depressive symptoms: results from the SU.VI.MAX 2 study.

   Aortic stiffness, inflammation, denutrition and prognosis in the oldest people.

   Association between dietary scores and 13-year weight change and obesity risk in a French prospective cohort.

7. Olié V, Galan P, Fezeu L
   Letter by Olie et al Regarding Article, "Dietary Flavonoids and Risk of Stroke in Women".

   High Dietary Saturated Fat Intake Accentuates Obesity Risk Associated with the Fat Mass and Obesity Associated Gene in Adults.

   Effect of B-vitamins and n-3 PUFA supplementation for 5 years on blood pressure in patients with CVD.
Modulation of the association between plasma intercellular adhesion molecule-1 and cancer risk by n-3 PUFA intake: a nested case-control study.

B Vitamin and/or omega-3 Fatty Acid Supplementation and Cancer: Ancillary Findings From the Supplementation With Folate, Vitamins B6 and B12, and/or Omega-3 Fatty Acids (SU.FOL.OM3) Randomized Trial.

Supplementation with B vitamins or n-3 fatty acids and depressive symptoms in cardiovascular disease survivors: ancillary findings from the Supplementation with FOLate, vitamins B-6 and B-12 and/or OMega-3 fatty acids (SU.FOL.OM3) randomized trial.

13. Dangour AD, Andreeva VA, Sydenham E, Uauy R
Omega-3 fatty acids and cognitive health in older people.

Association between pre-diagnostic biomarkers of inflammation and endothelial function and cancer risk: a nested case-control study.

15. Kesse-Guyot E, Andreeva VA, Jeandel C, Ferry M, Hercberg S, Galan P
A Healthy Dietary Pattern at Midlife Is Associated with Subsequent Cognitive Performance.

Adherence to Mediterranean diet reduces the risk of metabolic syndrome: A 6-year prospective study.

Nutrient and food intake is associated with hearing level measured 13 years later.

TFAP2B Influences the Effect of Dietary Fat on Weight Loss under Energy Restriction.

Nutrition and miscarriages: A litterature review.

Rare MTNR1B variants impairing melatonin receptor 1B function contribute to type 2 diabetes.

Identifying dietary patterns using a normal mixture model: application to the EPIC study.

34. Poupin N, Calvez J, Lassale C, Chesneau C, Tomé D
Impact of the diet on net endogenous acid production and acid-base balance.

35. Calvez J, Poupin N, Chesneau C, Lassale C, Tomé D
Protein intake, calcium balance and health consequences.

The report of male gender and retinopathy status improves the current consensus guidelines for the screening of myocardial ischemia in asymptomatic type 2 diabetic patients.

Use of clinical scores to detect dysglycaemia in overweight or obese women.

Diagnostic and prognostic performances over 9 years of a selective screening

39. Mekhmoukh A, Chapelot D, Bellisle F

40. Charlot K, Pichon A, Richelet JP, Chapelot D

42. Dupont C, Cordier AG, Junien C, Mandon-Pépin B, Levy R, Chavatte-Palmer P

Novel loci for adiponectin levels and their influence on type 2 diabetes and metabolic traits: a multi-ethnic meta-analysis of 45,891 individuals.

Cross-sectional and longitudinal associations of different sedentary behaviors with cognitive performance in older adults.

Dietary monounsaturated Fatty acids intake and risk of skin photoaging.

51. Hercberg S
Web-based studies: The future in nutritional epidemiology (and overarching epidemiology) for the benefit of public health?

Determinants of blood pressure treatment and control in obese people: evidence from the general population.

Impact of common variation in bone-related genes on type 2 diabetes and related traits.

Pre-diagnostic levels of adiponectin and soluble vascular cell adhesion molecule-1 are associated with colorectal cancer risk.

55. Oppert JM, Charreire H
The importance of the food and physical activity environments.

Dynamic relations between sedentary behavior, physical activity, and body composition after bariatric surgery.

Eating behaviour in obese patients with melanocortin-4 receptor mutations: a literature review.

58. Rolland-Cachera MF, Maillot M, Deheeger M, Souberbielle JC, Péneau S, Hercberg S
Association of nutrition in early life with body fat and serum leptin at adult age.

59. Rolland-Cachera MF
Towards a simplified definition of childhood obesity? A focus on the extended IOTF references.

60. Karusisi N, Bean K, Oppert JM, Pannier B, Chaix B
Multiple dimensions of residential environments, neighborhood experiences, and jogging behavior in the RECORD Study.

61. Péneau S, Jeandel C, Déjardin P, Andreeva VA, Hercberg S, Galan P, Kesse-Guyot E, the SU.VI.MAX 2 Research Group
Intake of specific nutrients and foods and hearing level measured 13 years later.

66. Chauliac M, Hercberg S
   Changing the food environment: the French experience.

67. Johansson M, Roberts A, Chen D, Li Y, Delahaye-Sourdeix M, Aswani N,
    Greenwood MA, Benhamou S, Lagiou P, Holcátová I, Richiardi L, Kjaerheim K,
    Agudo A, Castellsagué X, Macfarlane TV, Barzan L, Canova C, Thakker NS,
    Conway DI, Znaor A, Healy CM, Ahrens W, Zaridze D, Szeszenia-Dabrowska N,
    Lissowska J, Fabiánová E, Mateu I, Bencko V, Foretova L, Janout V, Curado MP,
    Koifman S, Menezes A, Wünsch-Filho V, Eluf-Neto J, Boffetta P, Franceschi S,
    Herrero R, Fernandez Garrote L, Talamini R, Boccia S, Galan P, Vatten L,
    Thomson P, Zelenika D, Lathrop M, Byrnes G, Cunningham H, Brennan P,
    Wakefield J, McKay JD
   Using prior information from the medical literature in GWAS of oral cancer identifies
   novel susceptibility variant on chromosome 4--the AdAPT method.

68. Kesse-Guyot E, Andreeva VA, Jeandel C, Ferry M, Touvier M, Hercberg S, Galan P
   Alcohol consumption in midlife and cognitive performance assessed 13 years later
   in the SU.VI.MAX 2 cohort.

69. Castetbon K, Harris JL, Schwartz MB
   Purchases of ready-to-eat cereals vary across US household sociodemographic
   categories according to nutritional value and advertising targets.

70. Le Port A, Gueguen A, Kesse-Guyot E, Melchior M, Lemogne C, Nabi H, Goldberg
    M, Zins M, Czernichow S
   Association between Dietary Patterns and Depressive Symptoms Over Time: A 10-Year
   Follow-Up Study of the GAZEL Cohort.

71. Handjieva-Darlenska T, Holst C, Grau K, Blaak E, Martinez JA, Oppert JM, Taylor
    MA, Sørensen TI, Astrup A
   Clinical Correlates of Weight Loss and Attrition During a 10-Week Dietary
   Intervention Study: Results from the NUGENOB Project.

    L, De Bourdeaudhuij I, van Assema P, Robertson A, Lobstein T, Oppert JM, Adány
    R, Nijpels G; SPOTLIGHT consortium
   Sustainable prevention of obesity through integrated strategies: The SPOTLIGHT
   project's conceptual framework and design.

2013

73. Wu YH, de Rotrou J, Vidal JS, Jeandel C, Rigaud AS, Kesse-Guyot E, Hanon O
   The K-T cancellation test in the older adults: Normative data and construct validity.

Hemoglobin glycation may partly explain discordance between HbA1c measurement and oral glucose tolerance test to diagnose dysglycemia in subjects with overweight or obesity.

Body Mass Index in relation to sperm count: an updated systematic review and collaborative meta-analysis.

Dietary patterns and risk of elevated C-reactive protein concentrations 12 years later.

Dual association between polyphenol intake and breast cancer risk according to alcohol consumption level: a prospective cohort study.

Quality of life after Roux-en-Y gastric bypass and changes in body mass index and obesity-related comorbidities.

Vernay M, Aidara M, Salanave B, Deschamps V, Malon A, Oleko A, Mallion JM, Hercberg S, Castetbon K

Sociodemographic, lifestyle and dietary correlates of dietary supplement use in a large sample of French adults: results from the NutriNet-Santé cohort study.

84. Rolland-Cachera MF, Péneau S
Growth trajectories associated with adult obesity.

85. Kesse-Guyot E, Andreeva VA, Lassale C, Ferry M, Jeandel C, Hercberg S, Galan P; SU.VI.MAX 2 Research Group
Mediterranean diet and cognitive function: a French study.

Bariatric surgery following treatment for craniopharyngioma: a systematic review and individual-level data meta-analysis.

Consumer acceptability and understanding of front-of-pack nutrition labels.

88. Frühbeck G, Toplak H, Woodward E, Yumuk V, Maislos M, Oppert JM

89. Lahjibi E, Heude B, Dekker JM, Højlund K, Laville M, Nolan J, Oppert JM, Balkau B; the RISC Study Group
Impact of objectively measured sedentary behaviour on changes in insulin resistance and secretion over 3 years in the RISC study: Interaction with weight gain.

90. Péneau S, Ménard E, Méjean C, Bellisle F, Hercberg S
Sex and dieting modify the association between emotional eating and weight status.

91. Andreeva VA, Martin C, Issanchou S, Hercberg S, Kesse-Guyot E, Méjean C
Sociodemographic profiles regarding bitter food consumption: cross-sectional evidence from a general French population.

Distinctive unhealthy eating pattern in free-living middle-aged hypertensives when compared with dyslipidemic or overweight patients.
Atherosclerosis, 2013, 228(2):478-84.

CD36 and SR-BI are involved in cellular uptake of provitamin A carotenoids by Caco-2 and HEK cells, and some of their genetic variants are associated with plasma concentrations of these micronutrients in humans.

Pharmacokinetics of Immunomodulator Treatments After Roux-En-Y Bypass in Obese Patient.

Change in proportional protein intake in a 10-week energy-restricted low- or high-fat diet, in relation to changes in body size and metabolic factors.

98. Kesse-Guyot E, Andreeva VA, Lassale C, Hercberg S, Galan P
Reply to T Aalbers et al.

Perception of front-of-pack labels according to social characteristics, nutritional knowledge and food purchasing habits.

Differential association between adherence to nutritional recommendations and body weight status across educational levels: a cross-sectional study.

Validity of web-based self-reported weight and height: results of the nutrinet-santé study.

Association between dietary intake of n-3 polyunsaturated fatty acids and severity
of skin photoaging in a middle-aged Caucasian population.

Socioeconomic, Lifestyle and Dietary Factors Associated with Dietary Supplement Use during Pregnancy.  

104. Vernay M, Salanave B, de Peretti C, Druet C, Malon A, Deschamps V, Hercberg S,  
Castetbon K  

Intakes of PUFAs Were Inversely Associated with Plasma C-Reactive Protein 12 Years Later in a Middle-Aged Population with Vitamin E as an Effect Modifier.  

Participant profiles according to recruitment source in a large web-based prospective study: experience from the nutrinet-santé study.  

107. Dalmas E, Kahn JF, Giral P, Abdennour M, Bouillot JL, Fellahi S, Oppert JM,  
Clément K, Guerre-Millo M, Poitou C  
Intima-Media Thickness in Severe Obesity: Links with BMI and metabolic status but not with systemic or adipose tissue inflammation.  

Midlife Iron Status Is Inversely Associated with Subsequent Cognitive Performance Particularly in Perimenopausal Women.  

Association between Adherence to Nutritional Guidelines, the Metabolic Syndrome and Adiposity Markers in a French Adult General Population.  

Lairon D  
Profiles of organic food consumers in a large sample of French adults: results from the nutrinet-santé cohort study.  

Using remote sensing to define environmental characteristics related to physical activity and dietary behaviours: A systematic review (the SPOTLIGHT project).  

114. Ahluwalia N, Andreeva VA, Kesse-Guyot E, Hercberg S

118. Méjean C, Droomers M, van der Schouw YT, Slujs I, Czernichow S, Grobbee DE, Bueno-de-Mesquita HB, Beulens JW

2014

Dietary quality and 6-year anthropometric changes in a sample of French middle-aged overweight and obese adults.

Prospective associations between serum biomarkers of lipid metabolism and overall, breast and prostate cancer risk.

123. Andreeva VA, Galan P, Julia C, Castetbon K, Kesse-Guyot E, Hercberg S
Assessment of Response Consistency and Respective Participant Profiles in the Internet-based NutriNet-Sante Cohort.

B Vitamin and/or n-3 Fatty Acid Supplementation and Health-Related Quality of Life: Ancillary Findings from the SU.FOL.OM3 Randomized Trial.

The environmental correlates of overall and neighborhood based recreational walking (a cross-sectional analysis of the RECORD Study).

Dietary Total and Insoluble Fiber Intakes Are Inversely Associated with Prostate Cancer Risk.

Interpretation of Plasma PTH Concentrations According to 25OHD Status, Gender, Age, Weight Status, and Calcium Intake: Importance of the Reference Values.

Obesogenic environments: a systematic review of the association between the physical environment and adult weight status, the SPOTLIGHT project.

Prospective associations between plasma saturated, monounsaturated and polyunsaturated fatty acids and overall and breast cancer risk - modulation by antioxidants: a nested case-control Study.

New biomarkers of coffee consumption identified by the non-targeted metabolomic
profiling of cohort study subjects.

131. Tao F, Lu H, Oppert JM, Basdevant A
ZHENG May Contribute to Obesity Phenotypes Based on Body Composition: A pilot Study on the Traditional Chinese Medicine Approach.

Baseline plasma fatty acids profile and incident cardiovascular events in the SU.FOL.OM3 trial: the evidence revisited.

Demographic, socioeconomic, disease history, dietary and lifestyle cancer risk factors associated with alcohol consumption.

134. Kesse-Guyot E, Andreeva VA, Ducros V, Jeandel C, Julia C, Hercberg S, Galan P
Carotenoid-rich dietary patterns during midlife and subsequent cognitive function.

Summary of recommendations for adults undergoing non-surgical anticancer treatment.

Association of perception of front-of-pack labels with dietary, lifestyle and health characteristics.

Association between intake of nutrients and food groups and liking for fat (The Nutrinet-Santé Study).

The Associations between Emotional Eating and Consumption of Energy-Dense Snack Foods Are Modified by Sex and Depressive Symptomatology.

Starchy food consumption in French adults: a cross-sectional analysis of the profile of consumers and contribution to nutritional intake in a web-based prospective cohort.
Weight-loss strategies used by the general population: how are they perceived?

141. Pouchieu C, Deschasaux M, Hercberg S, Druesne-Pecollo N, Latino-Martel P,
Touvier M
Prospective association between red and processed meat intakes and breast
cancer risk: modulation by an antioxidant supplementation in the SU.VI.MAX
randomized controlled trial.

142. Fried M, Yumuk V, Oppert JM, Scopinaro N, Torres A, Weiner R, Yashkov Y,
Frühbeck G; International Federation for Surgery of Obesity and Metabolic
Disorders-European Chapter (IFSO-EC); European Association for the Study of
Obesity (EASO); European Association for the Study of Obesity Management Task
Force (EASO OMTF)
Interdisciplinary European guidelines on metabolic and bariatric surgery.

Fezeu L
Relationships between adipokines, biomarkers of endothelial function and
inflammation and risk of type 2 diabetes.

144. Simino J, Shi G, Bis JC, Chasman DJ, Ehret GB, Gu X, Guo X, Hwang SJ,
Sijbrands E, Smith AV, Verwoert GC, Bragg-Gresham JL, Cadby G, Chen P,
Cheng CY, Corre T, de Boer RA, Goel A, Johnson T, Khor CC; LifeLines Cohort
Study, Luís-Ganella C, Luan J, Lyytikäinen LP, Nolte IM, Sim X, Söder S, van der
Most PJ, Verweij N, Zhao JH, Amin N, Boerwinkle E, Bouchard C, Dehghan A,
Eiriksdottir G, Elouaouadjia F, Gieger C, Harris TB, Hercberg S, Hofman A,
James AL, Johnson AD, Kähönen M, Khaw KT, Kutalik Z, Larson MG, Launer LJ, Li
G, Liu J, Liu K, Morrison AC, Nissinen A, Ong RT, Papanicolaou GJ, Penninx BW,
Raitakari OT, Rice K, Rivadeneire F, Rose LM, Sanna S, Scott RA, Siscovick DS,
Stolk RP, Uitterlinden AG, Vaidya D, van der Klauw MM, Vasan RS, Vieth RC,
Völzke H, Watkins H, Young TL, Aung T, Bochud M, Farrall M, Hartman CA,
Harkonen M, Khaw KT, Kähönen M, Khaw KT, Kutalik Z, Larson MG, Launer LJ, Li
G, Liu J, Liu K, Morrison AC, Nissinen A, Ong RT, Papanicolaou GJ, Penninx BW,
Psaty BM, Raffel LJ, Raitakari OT, Rice K, Rivadeneire F, Rose LM, Sanna S, Scott
RA, Siscovick DS, Stolk RP, Uitterlinden AG, Vaidya D, van der Klauw MM, Vasan
RS, Vieth RC, Völzke H, Watkins H, Young TL, Aung T, Bochud M, Farrall M,
Hartman CA, Laan M, Lakatta EG, Lehtimäki T, Loos RJ, Lucas G, Meneton P,
Palmer LJ, Rettig R, Sniehotta F, Tai ES, Teo YY, van der Harst P,
Wareham NJ, Wijmenga C, Wong TY, Fornage M, Gudnason V, Levy D, Palmas
W, Ridker PM, Rotter JI, van Duijn CM, Witteman JC, Chakravarti A, Rao DC
Gene-Age Interactions in Blood Pressure Regulation: A Large-Scale Investigation
with the CHARGE, Global BPgen, and ICBP Consortia.

C, Berger J, Hurrell RF, Mouquet-Rivier C
A higher proportion of iron-rich leafy vegetables in a typical burkinabe maize meal
does not increase the amount of iron absorbed in young women.

146. Castetbon K, Bonaldi C, Deschamps V, Vernay M, Malon A, Salanave B, Druet C
Diet in 45- to 74-Year-Old Individuals with Diagnosed Diabetes: Comparison to
Counterparts without Diabetes in a Nationally Representative
Similar postoperative safety between primary and revisional gastric bypass for failed gastric banding.

Plasma carotenoids and retinol and overall and breast cancer risk: a nested case-control study.

149. Méjean C, Szabo de Edelenyi F, Touvier M, Kesse-Guyot E, Julia C, Andreeva VA, Hercberg S

Liking for fat is associated with sociodemographic, psychological, lifestyle and health characteristics.

Application of the British Food Standards Agency nutrient profiling system in a French food composition database.

Interdisciplinary European guidelines on metabolic and bariatric surgery.

Clustering of midlife lifestyle behaviors and subsequent cognitive function: a longitudinal study.

Midlife dietary vitamin d intake and subsequent performance in different cognitive domains.

Changes in Sedentary Behaviours and Associations with Physical Activity through Retirement: A 6-Year Longitudinal Study.

Genome-wide association meta-analysis of human longevity identifies a novel locus conferring survival beyond 90 years of age.

166. Andreeva VA, Unger JB

Host society acculturation and health practices and outcomes in the United States: public health policy and research implications worldwide.

Are superoxide dismutase 2 and nitric oxide synthase polymorphisms associated with idiopathic infertility?

2015

168. Thereaux J, Corigliano N, Poitou C, Opp JM, Czernichow S, Bouillot JL

Comparison of results after one year between sleeve gastrectomy and gastric bypass in patients with BMI≥50 kg/m².

169. Thereaux J, Poitou C, Barsamian C, Opp JM, Czernichow S, Bouillot JL

Midterm outcomes of gastric bypass for elderly (aged≥60 yr) patients: a comparative study.

Association Between Arterial Stiffness and Skin Microvascular Function: The SUVIMAX2 Study and The Maastricht Study.

Am J Hypertens, 2015, 28(7):868-76.

171. Castetbon K

[Recent prevalence of child and adolescent overweight and obesity in France and abroad.]

Unemployment is associated with high cardiovascular event rate and increased all-cause mortality in middle-aged socially privileged individuals.

Body-weight perception and related preoccupations in a large national sample of adolescents.

Overall and abdominal adiposity in midlife and subsequent cognitive function.

How Computer Literacy and Socioeconomic Status Affect Attitudes Toward a Web-Based Cohort: Results From the NutriNet-Santé Study. 

Sociodemographic, psychological, and lifestyle characteristics are associated with a liking for salty and sweet tastes in French adults.

177. **Le Pluart D, Sabaté JM, Bouchoucha M, Hercberg S, Benamouzig R, Julia C**

Functional gastrointestinal disorders in 35 447 adults and their association with body mass index.

178. **Ciangura C, Nizard J, Poitou-Bernert C, Dommergues M, Oppert JM, Basdevant A**

[Pregnancy and bariatric surgery: Critical points.]

179. **Julia C, Méjean C, Vicari F, Péneau S, Hercberg S**

Public perception and characteristics related to acceptance of the sugar-sweetened beverage taxation launched in France in 2012.

Slight chronic elevation of C-reactive protein is associated with lower aerobic fitness but does not impair meal-induced stimulation of muscle protein metabolism in healthy old men.

181. **Sautron V, Péneau S, Camillieri G, Muller L, Ruffieux B, Hercberg S, Méjean C**

Validity of a questionnaire measuring motives for choosing foods including sustainable concerns.

182. **Thereaux J, Corigliano N, Poitou C, Oppert JM, Czernichow S, Bouillot JL**

Five-year weight loss in primary gastric bypass and revisional gastric bypass for failed adjustable gastric banding: Results of a Case-Matched Study.

183. **Thereaux J, Czernichow S, Corigliano N, Poitou C, Oppert JM, Bouillot JL**

Five-year outcomes of gastric bypass for super-super-obesity (BMI≥60 kg/m²): A case matched study.

184. **Bellicha A, Kieusseian A, Fontvieille AM, Tataranni A, Charreire H, Oppert JM**

Stair-use interventions in worksites and public settings - A systematic review of effectiveness and external validity.

Genome-wide meta-analyses of plasma Renin activity and concentration reveal association with the kininogen 1 and prekallikrein genes.

186. Paepegaey AC, Genser L, Bouillot JL, Oppert JM, Clément K, Poitou C

High levels of CRP in morbid obesity: the central role of adipose tissue and lessons for clinical practice before and after bariatric surgery.

Determinants of Vitamin D Status in Caucasian Adults: Influence of Sun Exposure, Dietary Intake, Sociodemographic, Lifestyle, Anthropometric, and Genetic Factors.

188. Lelong H, Galan P, Kesse-Guyot E, Fezeu L, Hercberg S, Blacher J

Relationship Between Nutrition and Blood Pressure: A Cross-Sectional Analysis from the NutriNet-Santé Study, a French Web-based Cohort Study.

Associations between weight status and liking scores for sweet, salt and fat according to the gender in adults (The Nutrinet-Santé study).

blood pressure variability: cardiovascular risk integrator or independent risk factor?

Should the WHO Growth Charts Be Used in France?

Performance of a five category front-of-pack labelling system - the 5-colour nutrition label - to differentiate nutritional quality of breakfast cereals in France.

Validation of a Web-based, self-administered, non-consecutive-day dietary record tool against urinary biomarkers.

Comparison of the sociodemographic characteristics of the large NutriNet-Santé e-cohort with French Census data: the issue of volunteer bias revisited.

Dietary supplement use among cancer survivors of the NutriNet-Santé cohort study.

Spatial heterogeneity of the relationships between environmental characteristics and active commuting: towards a locally varying social ecological model.
Int J Health Geogr, 2015, 14:12.

Descriptive study of sedentary behaviours in 35,444 French working adults: cross-sectional findings from the ACTI-Cités study.

Midlife plasma vitamin D concentrations and performance in different cognitive domains assessed 13 years later.

Successful behavior change in obesity interventions in adults: a systematic review of self-regulation mediators.

200. Hercberg S
Why is nutritional information necessary on food labels ?

Functional Gastrointestinal Disorders in Obese Patients. The Importance of the Enrollment Source.

Integrated pathway and epistasis analysis reveals interactive effect of genetic variants at TERF1 and AFAP1L2 loci on melanoma risk.

Evidence of a cumulative effect of cardiometabolic disorders at midlife and subsequent cognitive function.

204. Toplak H, Woodward E, Yumuk V, Oppert JM, Halford JC, Frühbeck G
2014 EASO Position Statement on the Use of Anti-Obesity Drugs.
Prospective association between alcohol intake and hormone-dependent cancer risk: modulation by dietary fiber intake.

Is the Relationship between Common Mental Disorder and Adiposity Bidirectional? Prospective Analyses of a UK General Population-Based Study.

Contribution of the low-frequency, loss-of-function p.R270H mutation in FFAR4 (GPR120) to increased fasting plasma glucose levels.

208. Camilleri GM, Méjean C, Bellisle F, Hercberg S, Péneau S
Association between Mindfulness and Weight Status in a General Population from the NutriNet-Santé Study.

Cholesterol and breast cancer risk: a systematic review and meta-analysis of prospective studies.

210. Oppert JM
[Management of obesity: The issue of follow-up after bariatric surgery].

Prospective association between dietary folate intake and skin cancer risk: results from the Supplémentation en Vitamines et Minéraux Antioxydants cohort.

How the Organic Food System Supports Sustainable Diets and Translates These into Practice.
Front Nutr, 2015, 2:19.

213. Fezeu LK, Batty GD, Gale CR, Kivimaki M, Hercberg S, Czernichow S
Correction: Is the Relationship between Common Mental Disorder and Adiposity Bidirectional? Prospective Analyses of a UK General Population-Based Study.

A Healthy Dietary Pattern at Midlife, Combined with a Regulated Energy Intake, Is
Related to Increased Odds for Healthy Aging.

Application of the nutrient profile associated to the 5-color nutrition label – 5-CNL – to foodstuffs currently on the market in France: Consistency with French food-based dietary guidelines (French).

**Cahiers de Nutrition et de Dietetique**, 2015.

Genome-wide meta-analysis identifies five new susceptibility loci for cutaneous malignant melanoma.

**Nat Genet**, 2015, 47(9):987-95.

**Appetite**, 2015, 84:34-42.

The nutrient profile of foods consumed using the British food standards agency nutrient profiling system is associated with metabolic syndrome in the su.vi.max cohort.

Objective Understanding of Front-of-Pack Nutrition Labels among Nutritionally At-Risk Individuals.

Genetic association analyses highlight biological pathways underlying mitral valve
prolapse.

Salivary Composition Is Associated with Liking and Usual Nutrient Intake.

Prospective associations between a dietary index based on the British Food Standard Agency nutrient profiling system and 13-year weight gain in the SU.VI.MAX cohort.

Healthy Aging 5 Years After a Period of Daily Supplementation With Antioxidant Nutrients: A Post Hoc Analysis of the French Randomized Trial SU.VI.MAX.

Are different vascular risk scores calculated at midlife uniformly associated with subsequent poor cognitive performance?

Prospective association between cancer risk and an individual dietary index based on the British Food Standards Agency Nutrient Profiling System.

Physical activity at home, at leisure, during transportation and at work in French adults with type 2 diabetes: The ENTRED physical activity study.

**Diabetes Metab**, 2015, 41(1):37-44.

Motives for dish choices during home meal preparation: results from a large sample of the NutriNet-Santé study.

**Int J Behav Nutr Phys Act**, 2015, 12:120.

Health and dietary traits of organic food consumers: results from the NutriNet-Santé study.

Discriminating nutritional quality of foods using the 5-Color nutrition label in the French food market: consistency with nutritional recommendations.

**Nutr J**, 2015, 14:100.

Behaviors and Outcomes: A New Research and Intervention Framework.  

### 2016

Correlations between Fruit, Vegetables, Fish, Vitamins, and Fatty Acids Estimated by Web-Based Nonconsecutive Dietary Records and Respective Biomarkers of Nutritional Status.  

245. Saidj M, Jørgensen T, Jacobsen RK, Linneberg A, Oppert JM, Aadahl M  
Work and leisure time sitting and inactivity: Effects on cardiorespiratory and metabolic health.  

Determining the association between types of sedentary behaviours and cardiometabolic risk factors: A 6-year longitudinal study of French adults.  

Validation of the FSA nutrient profiling system dietary index in French adults-findings from SUVIMAX study.  

Search for new loci and low-frequency variants influencing glioma risk by exome-array analysis.  

Body mass index association with functional gastrointestinal disorders: differences between genders. Results from a study in a tertiary center.  

Impact of Different Front-of-Pack Nutrition Labels on Consumer Purchasing Intentions: A Randomized Controlled Trial.  

251. Rolland-Cachera MF, Akrout M, Péneau S  
Nutrient intakes in early life and risk of obesity.  

252. Camilleri GM, Méjean C, Bellisle F, Hercberg S, Péneau S  
Mind-Body Practice and Body Weight Status in a Large Population-Based Sample
Weight loss, xanthine oxidase and serum urate levels: A prospective, longitudinal study of obese patients.

Dietary patterns of French adults: associations with demographic, socio-economic and behavioural factors.

Mediating role of energy-balance related behaviors in the association of neighborhood socio-economic status and residential area density with BMI: The SPOTLIGHT study.

Weight Status and Alcohol Intake Modify the Association between Vitamin D and Breast Cancer Risk.

Consumption of Dairy Products and Cognitive Functioning: Findings from the SU.VI.MAX 2 Study.

Alcoholic beverages, obesity, physical activity and other nutritional factors, and cancer risk: A review of the evidence.

[Weight and height local growth charts of Algerian children and adolescents (6-18 years of age).]

Prospective association between the Dietary Inflammatory Index and mortality: modulation by antioxidant supplementation in the SU.VI.MAX randomized control trial.

Neighbourhood typology based on virtual audit of environmental obesogenic characteristics. 

Self-defined residential neighbourhoods: size variations and correlates across five European urban regions. 

A Meta-analysis of Individual Participant Data Reveals an Association between Circulating Levels of IGF-I and Prostate Cancer Risk. 

Association Between Blood Pressure and Adherence to French Dietary Guidelines. 

The Dietary Inflammatory Index Is Associated with Prostate Cancer Risk in French Middle-Aged Adults in a Prospective Study. 

Associations between fruit, vegetable and legume intakes and prostate cancer risk: results from the prospective Supplémentation en Vitamines et Minéraux Antioxydants (SU.VI.MAX) cohort. 

Intuitive eating is inversely associated with body weight status in the general population-based NutriNet-Santé study. 
**Obesity (Silver Spring)**, 2016, 24(5):1154-61.

Socioeconomic Indicators Are Independently Associated with Nutrient Intake in French Adults: A DEDIPAC Study. 
**Nutrients**, 2016, 8(3):158.

Prospective association between a dietary quality index based on a nutrient profiling system and cardiovascular disease risk. 

Immunochip analysis identifies association of the RAD50/IL13 region with human longevity. 

10-year cumulative and bidirectional associations of domain-specific physical activity and sedentary behaviour with health-related quality of life in French adults: Results from the SU.VI.MAX studies. 

Comparison Between a Self-Administered and Supervised Version of a Web-Based Cognitive Test Battery: Results From the NutriNet-Santé Cohort Study. 

Seeking health- and nutrition-related information on the Internet in a large population of French adults: results of the NutriNet-Santé study.
